1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices)(Article 39(1))(see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

Supplemental Box

(To be used when the space in any of the preceding boxes is not sufficient)

Section III. Non-establishment of report (subject matter not requiring preliminary examination)

In reference to claims 1-87 the subject matter under article 34(4)(a)(i) which is defined under article 67.1 does not require International Examining Authority to carry out an international preliminary examination on an international application because the subject matter as claimed is a mere presentation of information. The method for reporting of qualitative data summarizing answers provided by respondents does not produce a concrete, tangible and useful result. The claims, even if written in method or system form, the steps and the outcome does not seem to achieve a concrete and useful result. Therefore, it is unclear if the method for collecting this data is directed to a practical application that provides a useful, concrete and tangible result. It appears the method of steps would not necessarily require a tangible result, since it just collecting an opinion of data elements and presenting them (a subjective data gathered in the filed, such as a survey or report does not have concrete and tangible patentable weight.
